## Certification of Post-compulsory Student Achievement in 2002

In 2002, the Curriculum Council continued to issue the Statement of Results to all Year 11 and Year 12 students who completed either an upper school Curriculum Council subject or a Unit of Competency/National Training Module. In addition, those Year 12 students who met Secondary Graduation requirements were issued with the Western Australian Certificate of Education (WACE).

## Statement of Results for Year 12 Students

Statements of Results were issued to all Year 12 students who had achieved at least one Unit of Competency/National Training Module or a Curriculum Council subject. The Statement of Results was issued to 19725 ( 9316 males and 10409 females) 2002 Year 12 students.

The Statement of Results recorded the following:
(a) Grades achieved in Year 11 and Year 12 Curriculum Council subjects (A, B, C, D or E).
(b) Achievement of Units of Competency/National Training Modules and the name of the relevant Registered Training Organisation/Registered Training Provider. The number of Vocational Education and Training (VET) subject equivalents were also indicated.
(c) Achievement of a WACE (relating to secondary graduation).
(d) Achievement of Curriculum Council English language competence.
(e) Completion of Murdoch University units.
(f) Results in Tertiary Entrance Examination subjects.
(g) Achievement of Exhibitions and Awards.

Details relating to each item which appears on the Statement of Results are given below.

## Grades in Curriculum Council Subjects

Curriculum Council subjects were certificated on the Statement of Results. Full year Curriculum Council subjects typically have been studied for at least 110 hours. In order to provide a sound basis for standardsreferenced assessment, materials for Curriculum Council subjects included a syllabus statement with:

- either objectives or outcomes stated in behavioural terms;
- either an Assessment Structure or a Common Assessment Framework; and
- either a set of grade-related descriptors or performance criteria.

The Curriculum Council moderated the grades in its subjects (eg by visitation or consensus) to ensure comparability of grades from school to school.

The grades awarded at the conclusion of a subject were based on each student's performance as judged by reference to the grade-related descriptors or grading algorithm. The grades may be interpreted as follows:

Grade A indicates 'Very High Achievement'<br>Grade B indicates 'High Achievement'<br>Grade C indicates 'Satisfactory Achievement'<br>Grade D indicates 'Limited Achievement'<br>Grade E indicates 'Inadequate Achievement'.

## Structured Workplace Learning

Structured Workplace Learning subjects provided students the opportunity to develop skills in the workplace and obtain grades contributing to the Western Australian Certificate of Education.

For the Western Australian Certificate of Education, students could only obtain recognition for one Stage 1 Introduction to Workplace Learning subject and one Stage 2 Industry-specific Workplace Learning subject.

## Units of Competency (competencies)/National Training Modules (modules)

Units of Competency (competencies)/National Training Modules (modules) were available for a range of industry areas. These competencies/modules were included in schools' Year 11 and Year 12 programs. Students who demonstrated or met the required outcomes for the competencies/modules, through a school which was accredited to run them, had the achievement recorded on their Statements of Results. From 2000, the name and code of the Registered Training Organisation (RTO) responsible for assessing the competency/module has also been recorded.

In 2002, following the signing of the Joint Ministerial Policy Statement in regard to the future policy directions for VET in schools, the Curriculum Council in consultation with stakeholders, issued certificates for the first time to students who completed negotiated competencies/modules through a school with Training Provider status (there were 23 such schools in 2002). The name and code of the Registered Training Provider (RTP) was recorded on these students' Statements of Results. The Curriculum Council issued 199 full qualifications to 188 Year 12 students and 756 partial qualifications to 614 Year 12 students who attended RTPs. Also, the Curriculum Council issued 73 full qualifications to 68 Year 11 students and 1064 partial qualifications to 828 Year 11 students.

The achievement of competencies/modules was recognised by the Curriculum Council for the Statement of Results and Western Australian Certificate of Education in two categories. The first category includes those which were studied as part of a Curriculum Council subject (ie embedded competencies/modules). The second category is where a student studied a competency/module in addition to Curriculum Council subjects (ie stand alone/non-embedded competency/module).

Stand alone/non-embedded competencies/modules successfully completed by students were grouped by the Curriculum Council into 55 hour or 110 hour blocks (using approved notional hours) to form half and full subject equivalents respectively. Competencies/modules from any industry area were grouped by the Curriculum Council to form Vocational Education and Training (VET) subject equivalents. These VET subject equivalents contributed towards the Western Australian Certificate of Education. Students who successfully completed competencies/modules that represented subject equivalents had the number of subject equivalents indicated on their Statement of Results.

From 2001 until June 2002, Units of Competency/National Training Modules were completed in accord with the Australian Recognition Framework (ARF). However, from 1 July 2002, competencies/modules have been completed in accord with the Australian Quality Framework (AQTF).

## Western Australian Certificate of Education (secondary graduation)

To achieve a Western Australian Certificate of Education a student must have met the following requirements:

- complete at least ten full year (or equivalent) Curriculum Council subjects;\#
- obtain an average grade of C or better in at least eight full year (or equivalent)
- Curriculum Council subjects.\#\# At least four of these subjects must be at Year 12 level; and
- achieve Curriculum Council English language competence.
\# Up to $40 \%$ of a student's program of study (ie 4 out of 10 full year subjects) for meeting the subject completion requirement may comprise Vocational Education and Training (VET) subject equivalents.
\#\# Up to $25 \%$ (ie 2 out of 8 full year subjects) for meeting the C grade or better requirement may comprise VET subject equivalents. The inclusion of the VET subject equivalents for Secondary Graduation applies to Units of Competency/National Training Modules successfully completed by Year 11 and Year 12 students from 1999 studied in addition to Curriculum Council subjects.

Students who completed Year 12 and met the above requirements were issued with the Western Australian Certificate of Education (WACE). The certificate indicated that the student had satisfied the requirements for secondary graduation. Western Australian Certificates of Education were issued to 17051 ( 7835 males and 9216 females) 2002 Year 12 students.

## English Language Competence

To achieve Curriculum Council English language competence students must have received a grade C or better in one of the following Year 12 Curriculum Council subjects:

- English
- English Literature
- English as a Second Language
- Senior English
- Vocational English.

Alternatively, students who were enrolled in one of the above subjects may have sat the Curriculum Council English Language Competence Test. A pass satisfied the English language competence requirement.

## Units Completed at Murdoch University

The Curriculum Council considered, through its consultation processes, a proposal from Murdoch University to include successful completion of university units on students' Statements of Results. In 2002, eight schools advised the Curriculum Council of the students who had successfully completed two units being offered at Murdoch University. These units were as follows: Introduction to Economics (C161) and Interactions of Society and Technology (A1151). The code and name of the unit was recorded on the 58 Year 12 students' Statement of Results.

## Tertiary Entrance Examination Results

The following information was listed for each Tertiary Entrance Examination subject:

- school assessment
- raw examination mark
- scaled mark (except in the case of English as a Second Language)
- decile place (except in the case of English as a Second Language).

## Exhibitions and Awards

The Curriculum Council granted the following awards:

- Beazley Medal: TEE
- Beazley Medal: VET
- General Exhibitions
- Subject Exhibitions
- Certificates of Distinction
- Certificates of Excellence
- Special General Awards
- Special Subject Awards
- Special Certificates of Distinction.

## Statement of Results for Year 11 Students

Statements of Results were issued to 22666 (11423 males and 11243 females) Year 11 students who completed either at least one Curriculum Council subject or at least one competency/module in 2002. The Statements of Results were sent to schools in March 2003 and staff at these schools were asked to distribute them to their students.

## Curriculum Council

## Summary Statistics on Tertiary Entrance Examination Papers, 2002

## Full use of the marking scale

Examiners are expected to make full use of the marking scale. A restricted range of marks increases the risk of mis-ranking candidates. In 14 subjects ( 14 in 2001) the marks spanned 90 or more percentage points, and in a further 7 subjects ( 10 in 2000) the range was $80-89$. The subjects with a range less than 80 were Chinese: Advanced, Chinese: Second Language, ESL, Geology, German, Indonesian: Advanced, Indonesian: Second Language, Malay: Advanced, Music and Physical Science. With the exception of ESL and Physical Science, the examinations in these subjects customarily have a restricted range of marks because of the small number of candidates and their restricted range of ability relative to the examination.

## Level of difficulty

TEE examiners were asked to set examinations that would result in mean raw marks of 55-60 percent. Eighteen examining panels (16 in 2001) achieved the desired level of difficulty.

There was no examination with a mean mark below 50 percent in 2002. Despite a small number of complaints about the excessive difficulty of Calculus, the statistics provided no evidence that the examination was too difficult.

Four subjects had comparatively easy papers with mean marks above 65 - Applicable Mathematics, Chinese: Second Language, German and Music.

In German, where the mean raw examination mark was 69.84 , the high number of background candidates gave an impression that the 2002 examination paper was too easy. According to the Chief Examiner (a person of considerable experience in the subject) the level of difficulty of the paper was appropriate for second language candidates. However, with background speakers excluded the mean raw examination mark is 66.70 , which is still well above the desired level. Eligibility for this subject remains problematic because there is a wide spectrum of language background amongst candidates, including many of those who are not categorised by the Curriculum Council as "Background Candidates". The same applies to the mean raw mark for the TEE in Chinese: Second Language.

Examiners of Applicable Mathematics and Music will be asked to make their papers for 2003 more difficult.

Raw TEE marks were subjected to standardisation, which adjusted them to the same distribution in every subject. Thus, if examiners did not achieve a mean mark in the desired range (55-60), candidates who sat the examination to the best of their ability experienced no disadvantage. However, their raw examination marks may have been adjusted by a considerable amount during standardisation.

## Reliability

Overall, the reliabilities of all of the examinations were high in 2002, considering that they were untrialled tests. They ranged from 0.66 to 0.95 ( 0.62 to 0.93 in 2001). Eleven subjects had a higher reliability in 2002 than in 2001, while eleven had lower reliabilities.

In 2002 conspicuous increases in the reliability statistic were seen in Art, Chinese: Second Language and ESL. For Art and ESL this was a return to the level of previous years after an atypically low result in 2001. It is suggested that in the case of Chinese: Second Language the increase was an artefact from the small number of candidates.

Conspicuous decreases in the reliability statistic were seen in Indonesian: Advanced, Indonesian: Second Language, Malay: Advanced and Music in 2002. In the case of the advanced LOTE subjects, these changes coincided with a change in examination format, involving the removal of oral components. The changes in Indonesian: Second Language and Music are evidence that these examiners were less successful in ranking candidates than in 2001.

## Concurrent evidence for validity

The Pearson correlation coefficients between TEE marks and school marks, after adjustment to a common scale, provide concurrent evidence of validity for the examinations. They represent the extent to which the two measures - the external assessment and the internal assessment-measure the same construct. If the TEE measures something markedly different from what teachers measure with their assessments, the correlation will be substantially lower than 1.00.

It can be seen in Table 4.11 that the correlations between school-based marks and the TEE are generally high, ranging from 0.72 to 0.96 ( 0.71 to 0.96 in 2001). An overall judgment that the TEE assessed the same achievements as the school-based assessments seems reasonable.

## Tertiary Entrance Examination - Explanation of Marks

The steps by which a scaled mark is reached for a Year 12 Tertiary Entrance Rank Subject are detailed below. The scaled mark is the one that appears on the Statement of Results sent to examination candidates and is the mark which is used to calculate a Tertiary Entrance Rank.

## 1. SCHOOL-BASED MARKS

At the end of the year teachers use information based upon such things as semester examinations, classroom tests, class work, research assignments and practical work to summarise each student's performance.

## (i) Grades

Grades of A, B, C, D or E are awarded by schools in accordance with procedures established by the Curriculum Council. These procedures help ensure that the grades are comparable between schools.
(ii) School Assessment/School Marks

School Assessments are numerical marks in the range of 0 to 100 awarded to students and are submitted by teachers for each Tertiary Entrance Examination subject.

## Moderation of School Assessments

It is likely that there will be some differences in the ways that teachers in different schools award school assessments. To adjust for these differences, the standardised examination marks are used to moderate school assessments so that marks given by different teachers are comparable.

After the moderation process has been carried out students can be confident that the resulting mark (called the moderated school assessment) can be directly compared with the moderated school assessments of students from other schools in the same subject.

It is to be expected that assessment marks awarded by a school will change as a consequence of moderation; however, moderation never alters a student's relative position in the school/subject group.

The moderated school assessments are standardised using the same procedure which is used to standardise the raw examination marks.

## 2. EXAMINATION MARKS

## Raw Examination Mark

Each student enrolled in a Tertiary Entrance Examination subject is eligible to sit for the Tertiary Entrance Examination (TEE) in that subject.

Students' answers to examination questions are marked by two qualified markers independently under the supervision of a Chief Marker. The overall mark obtained by the student on the examination is recorded as a mark out of 100. It is referred to as the Raw Examination Mark.

## Standardisation of Examination Marks

The raw examination marks for each subject are adjusted so that they indicate students' relative positions in the whole group taking the examination. For example, after standardisation a mark, say 75 , in any examination has the same (standard) meaning as the same mark in any other examination. A standardised mark of 75 means that the student's performance in the examination is better than $90 \%$ of the students attempting the examination.

## 3. COMBINED MARK

The Curriculum Council believes that a better indicator of a student's past performance and potential for future success is provided by a mark which represents a combination of the examination mark and the moderated school assessment.

The combined mark is obtained by taking the average of the standardised examination mark and the standardised moderated school assessment.
4. DECILE PLACE

The decile place of a student's combined mark is indicated by a number from 1 to 10 and gives an indication of how well the student performed in comparison to all students in the subject. For example:

1 indicates the student is in the top $10 \%$ of students in the subject.
2 indicates the student is in the second $10 \%$ of students in the subject.

## 5. SCALING

(i) Method of Scaling

Scaling adjusts for differences in difficulty between subjects and aims to ensure that students are not disadvantaged by their subject choice. The Average Marks Scaling (AMS) method is used jointly by the Curriculum Council and the Tertiary Institutions Service Centre to adjust combined marks onto a common scale.

The AMS method uses the information provided by students' combined marks to compare the abilities of groups of students studying each subject. This information is used to scale the marks of all subjects.
(ii) Scaled Marks

Marks for Tertiary Entrance Rank Subjects are scaled so that marks in different subjects can be compared with each other, and can be added together to calculate Tertiary Entrance Ranks.

Scaled marks are obtained by using the information obtained from the Average Marks Scaling (AMS) method to adjust the combined marks for a subject according to the ability of the students sitting the examination.

The diagram below summarises the steps involved in obtaining scaled marks in a subject.

For a given year, the addition of the percentages is greater than 100 per cent as the categories used are not independent. That is, some "re-entry" students could also be classified as mature-age students. These students would have been counted in both categories.
** "Repeating" students are Year 12 students who repeat at least one Curriculum Council approved Year 12 subject in which they had received a grade in the previous year. For example a student who repeated Year 12 Chemistry in 2002 received a grade in it in 2001
*** "Re-entry" students are Year 12 students who received a grade in at least one Curriculum Council approved Year 12 subject and had not been enrolled in a Curriculum Council approved Year 12 subject for at least one year. Students re-entering enrolled do not have to enrol in the Year 12 subjects completed previously.
**** Mature-age students are students aged 19 years or more on 1 March of the year they received grade(s) in at least one Curriculum Council approved Year 12 subject
***** These categories of students do not include "repeating", "re-entry" or mature-age students

* Up until and including 1994, full-time students were those enrolled in five or more Secondary Education Authority (SEA) approved subjects. Students enrolled in four or fewer approved subjects were classified as part-time. However, in 1995, the SEA resolved that full-time students be classified as those who studied four or more (full year or equivalent) SEA approved subjects.

* No. of enrolled candidates $=$ No. of non-exam candidates + No. who sat + No. who were absent.
** 1995, the Secondary Education Authority changed the procedure for recording absentees for Art, in Music and LOTE subjects. Previously, students who had not sat for the written examination were recorded as being absent even if they had completed the Visual Diary, Performance or Oral/Aural component of the examination.

From 1995, students in these subjects are recorded as being absent if they did not attend both parts of their examination.

## Notes on Table 4.11

Table 4.11 displays statistical data relating to the effectiveness of the 2002 Tertiary Entrance Examinations as assessment instruments for the purpose of university entrance. Statistics in parentheses are for the 2001 papers, and are included for comparison. The notes provided below should be read in conjunction with the table.

Since these statistics are intended to allow the reader to evaluate the TEE papers, rather than the candidates, summary statistics for papers set in other States (ie Japanese: Advanced and Modern Greek) are not stated. For these examinations some of the summary statistics are unavailable because only a limited set of marks was available to the Curriculum Council.

| Column 2: | The number of candidates in WA in 2002 (2001 in parentheses). |
| :--- | :--- |
|  | Column 3: |
| The mean is the average percentage score achieved by candidates on the <br> paper and indicates the extent to which the examination's difficulty was <br> appropriate to the candidates for each subject. Examining panels are <br> instructed by the Curriculum Council to try to set a paper with a mean in <br> the range 55-60. |  |
| Column 4: | The range is one plus the difference between the maximum and minimum <br> percentage scores achieved by candidates. It is a measure of the spread of <br> scores and use of the measurement scale. Examining panels are instructed <br> to try to use the full measurement scale of 1 to 99 as this allows greater <br> discrimination between students. |
| Column 5: | The reliability indicates how internally consistent the examination is. A <br> high reliability is needed for candidates to be ranked accurately. A <br> perfectly reliable examination would be completely free of errors of <br> measurement and would produce the same candidate scores each time it <br> was set and marked. A perfectly reliable examination would have all items <br> measuring in the same dimension and would result in a reliability of 1.0. |
|  | Where papers allow students a choice of questions between sections, or <br> throughout the entire paper, it is not appropriate to calculate the reliability. |
| Column 6: | The reliability is given for the paper as a whole and for the multiple-choice <br> section where appropriate. |
| The Pearson correlation coefficient between the standardised examination <br> marks and the standardised moderated school assessments provides the <br> concurrent evidence for validity of the paper. A perfectly linear <br> relationship between candidates' standardised examination marks and <br> standardised moderated school assessments would result in a correlation of <br> 1.0 and would be evidence that the examination measured the same <br> achievements as were assessed in class by teachers. |  |

* Standardised marks for Japanese: Advanced and Modern Greek are not provided as the raw examination marks were not standardised and are
not comparable to other subjects.

Note: The raw marks which are standardised to $35,50,65$ and 75 are those of students whose mark is higher than $10,30,70$ and 90 per cent respectively of other students sitting the examination. A raw mark of 0 becomes a standardised mark of 0 , and the highest raw mark is standardised to 100. Having determined these standardisation points other raw examination marks may be transformed to standardised marks by linear interpolation.

Table 4.16 Subject Loading for each Tertiary Entrance Examination Subject, 2002

The subject loading is the mean Scaled Mark minus 58. Fifty-eight is the overall mean of the scaled marks for all subjects. The subject loading is the extent to which an average student's combined mark is affected by the scaling process. For instance, an average student's scaled mark in Accounting was 1.59 marks lower than his/her combined marks.

* The population is the scaling population. To be included in this population a student must:
- have a combined mark for the subject.
- have marks for at least four TEE subjects including at least one from each of List 1 and List 2.

For language subjects that include both background and non-background speakers, the results of students who are background speakers are excluded.
** These subjects had combined marks that were not based on the standardised distribution. The scaling statistics are therefore not comparable with those of other subjects.

* Pearson Product-moment Correlation Coefficients between the scaled marks achieved by students in the particular subject combination. The number of students in a particular subject combination is indicated under the correlation.

Note: As the combined marks for English as a Second Language are not scaled, details are not included in the table. Also, Japanese: Advanced and Modern Greek details are not included as the examinations in these subjects are produced by other Australian States and the subjects have very small candidatures.

[^23]:    * No. of enrolled candidates $=$ No. of non-exam candidates + No. who sat + No. who were absent.
    ** In 1995, the Secondary Education Authority changed the procedure for recording absentees for Art, Music and LOTE subjects Previously, students who had not sat for the written examination were recorded as being absent even if they had completed the Visual Diary, Performance or Oral/Aural component of the examination.

[^24]:    * Up until and including 1994, full-time students were those enrolled in five or more Secondary Education Authority (SEA) approved subjects. Students enrolled in four or fewer approved subjects were classified as part-time. However, in 1995, the SEA resolved that full-time students be classified as those who studied four or more (full year or equivalent) SEA approved subjects.

[^25]:    * Private candidates who were absent as a percentage of the number privately enrolled for each subject.

    Note: Examinations in English as a Second Language, Japanese: Advanced and Modern Greek could not be taken as a private candidate.

[^26]:    * Persons in each year who sat for $1,2,3$ etc TEE subjects as a percentage of the total.

[^27]:    * The population consists of all those with a valid mark in the examination.
    ** Statistics on two other TEE subjects, Modern Greek and Japanese:Advanced, are not presented above because the examinations were written in other States and there were insufficient data from the WA candidates to derive meaningful summary statistics.

[^28]:    ** The populations consist of all Year 12 students who have a numerical school assessment and a raw examination mark for the subject concerned.
